PETERSON AMBLESSED

FULL-STACK & MOBILE DEVELOPER

Anambra, Nigeria • +234 806 742 1594 • **petersonamblessed@gmail.com** • **github.com/pac-son**

PROFESSIONAL SUMMARY

Full-Stack, Mobile, and Backend Developer experienced in building and deploying web, mobile, SaaS, fintech, and blockchain applications. Proficient with TypeScript, React, Next.js, React Native, Expo, Node.js, Python, FastAPI, SQL/NoSQL databases, and Web3 technologies.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript, Python, Solidity, Java, SQL, C++; Rust (learning)
Frontend & Mobile:	React, Next.js, React Native, Expo, Tailwind CSS, Electron, Sass
Backend:	Node.js, Express.js, Python, FastAPI, REST APIs
Databases & ORMs:	PostgreSQL, Neon, Supabase, Prisma, Drizzle, SQLAlchemy, MongoDB, MySQL
Blockchain & Web3:	Solidity, Hardhat, Ethereum, Web3.js, BitcoinJS, IPFS, Smart Contracts
Tools & Infra:	Docker, Docker Compose, Celery, Redis, Render, Git, GitHub, Postman, Bun, Biome
Auth & Payments:	Clerk, Stripe, Paystack, Authentication & Authorization

WORK EXPERIENCE

Frontend Developer Intern — Brainbench Technology `Apr 2025 – Oct 2025`

- Developed responsive web applications using React, Next.js, TypeScript, and Tailwind CSS.
- Built cross-platform mobile interfaces with React Native and reusable component libraries.
- Integrated frontend client applications with backend RESTful APIs and third-party services.
- Debugged application issues and improved cross-browser and mobile responsive performance.
- Participated in technical field operations involving network setup and examination infrastructure.

SELECTED PROJECTS

Bank Statement Extractor & Credit Scoring API 2025

Python 3.11, FastAPI, PostgreSQL, SQLAlchemy, OCR (pdfplumber, pytesseract, OpenCV), Celery, Redis, Docker, Render

- Built and deployed a production fintech API for extracting and standardizing bank statements across 10+ Nigerian banks and regional formats (Ghana/Kenya).
- Implemented OCR pipelines, loan-stacking detection, fraud indicators, multi-account consolidation, and asynchronous queue processing with Celery and Redis.

ParcelGo — Mobile Delivery Platform 2025

React Native, Expo, TypeScript, REST APIs (github.com/pac-son/parcelgo)

- Developed a cross-platform mobile logistics app connecting senders, dispatch drivers, and receivers with live dispatch creation and parcel status tracking.
- Engineered mobile user workflows for KYC identity verification, direct in-app messaging, secure payment settlement, and location-based courier routing.

Forza — Blockchain Certificate Verification System 2025

Solidity, Hardhat, Ethereum, Next.js, React, TypeScript, Web3.js, IPFS

- Developed smart contracts in Solidity with Hardhat for credential issuance (forza-core) and built an interactive Web3 Next.js frontend (forza-web).
- Anchored cryptographic hashes to Ethereum and IPFS for instant, tamper-resistant third-party credential verification.

Decentralized Escrow Platform 2025

Solidity, Ethereum, Next.js, TypeScript, Web3.js, Tailwind CSS (Live: pac-escrow.vercel.app)

- Built an on-chain escrow smart contract platform on Ethereum facilitating trustless peer-to-peer milestone payments with multi-party dispute safeguards.

Property Marketplace — Real Estate Platform 2025

Next.js, TypeScript, Prisma, Neon PostgreSQL, Tailwind CSS

- Built a full-stack property marketplace for residential rentals and purchases with location discovery, multi-filter search, and landlord dashboards.

SaaS Savings Platform — Shopify Layaway Widget 2025

Next.js, TypeScript, Clerk, Stripe, Drizzle ORM

- Built a multi-tenant SaaS application allowing merchants to offer structured layaway/savings plans with Stripe recurring payments and Clerk auth.

EDUCATION

Federal University Otuoke — B.Sc. in Computer Science and Informatics 2021 – 2025
Bayelsa / Anambra, Nigeria
